BUILDING PERMIT
HAZARDOUS MATERIALS
TESTING AND ABATEMENT
INFORMATION FORM

In buildings to be renovated or demolished, materials having the potential for releasing asbestos fibres or other hazardous materials shall be removed prior to renovation or demolition. Refer to WorkSafe BC for additional information.

Project Name:

Project Address:

I hereby give assurance that all materials having the potential for releasing asbestos fibres or other hazardous material will be removed from the project area to be renovated or demolished. Confirmation that it has been done will be provided in conjunction with the request for the first required inspection.

- Acceptable confirmation includes a clearance letter from a qualified hazmat surveyor or qualified hazmat abatement contractor. The clearance letter will indicate that abatement of hazardous materials was conducted in accordance with regulatory requirements (the Worker's Compensation Act, the WorkSafe Occupational Health and Safety Regulation and the BC Ministry of Environment regulations)

I hereby give assurance that there are no materials having the potential for releasing asbestos fibres in the project area to be renovated or demolished. Confirmation of this will be provided in conjunction with the request for the first required inspection.

- Acceptable confirmation includes a clearance letter from a qualified hazmat surveyor or qualified hazmat abatement contractor. The clearance letter will indicate that no hazardous materials were found in representative bulk samples collected from the project in accordance with regulatory requirements (the Worker's Compensation Act, the WorkSafe Occupational Health and Safety Regulation and the BC Ministry of Environment regulations)
