

2019/03/05

Dear Property Owner,

RE: City of Langford Sewer System Connection

You are receiving this letter as your property is adjacent to a sewer main and has not yet been connected to the municipal sewer system.

If you have recently connected to the municipal sewer system, please disregard this correspondence.

While 95% of adjacent properties have connected to the system, which benefits all residents and businesses in Langford, the connection of all adjacent properties is necessary to ensure the long-term viability of this sewer infrastructure.

As per Bylaw No. 1600, any Langford property adjacent to an existing sewer main must connect to the municipal sewer system no later than **December 31, 2019**.

In an effort to ensure that mandatory connection does not cause a true financial hardship, the City has developed financial assistance options for affected residential homeowners. For further information or if you believe you require financial assistance, please review the enclosed booklet. If you have additional questions regarding financing options, please contact the City of Langford at (250) 478-7882 or by email at administration@langford.ca.

Please also review the enclosed booklet to find additional information on the sewer connection process. If you have further questions regarding the sewer connection process, please contact Corix|West Shore Environmental Services, who operate and maintain the City of Langford's sewer system, at (250) 478-2187 or by email at info.westshore@corix.com.

Thank you for your time and review of this information.

Sincerely,

Michael Dillabaugh, CPA, CA
Director of Finance
