Hi Rhonna,

Thank you for your call last week.

As we previously discussed, the single family home or the property will not be altered in conjunction with this rezoning application. The P1A (Neighbourhood Institutional) zone allows for the following uses: assisted living, community garden, **group daycare**, one (one-family dwelling), in conjunction with a place of worship, accessory buildings and structures and uses accessory to a principal use.

Thanks,

Matt

According to google maps, this is the address of the existing daycare that I can see from my apartment. I don't know what the new zoning P1A, allows. I'd like to know whether building works are involved and to what extent. I have no objection to more children, but would not want to see any trees cut down, extensive building works, or building higher than the existing two stories.

Please let me know more details of the proposal.

I am enclosing a photo of my view of the property, which has just this summer been obscured by growing trees on adjacent property. Previously I have been able to see the play yard in all seasons.
