Good Day

My wife and I live on Hockley Ave. We have lived here for almost 6 years and have noticed a substantial increase in traffic and parking on Station Ave. as a result. Your counsel has on numerous occasions indicated that people should move to Langford.

On the east section of Station Ave. we have businesses that use this parking and if that is taken away these businesses will suffer .

If you would use only what is laid out now it could work, while upgrading the parking on the rest of the property.

One of the businesses is the Royal Canadian Legion #91 that has operated from the same location for a very long time and there are quite a lot of seniors that are not capable of walking there any more, still enjoy coming for lunch or dinner to support their Legion.

On the west side of Station Ave., a park and ride that takes up a large portion of this street. Will they be sent to another location? There are also businesses on that street will also be impacted by no parking as well.

My wife and I believe that with more conversation with the businesses involved this can be possible, but you have asked the people to come, and they have, but street parking is becoming almost non-existent.
